

Facing Hysterectomy?

Today, your doctor can treat a range of gynecologic conditions – from chronic pelvic pain to abnormal bleeding – minimally invasively with *da Vinci*® Hysterectomy. This procedure requires only a few small incisions, so you can get back to life faster – without the usual recovery following major surgery.

Learn why *da Vinci*® Hysterectomy may be your best treatment option.

Talk to your doctor and visit:

da Vinci. Surgery
Less invasive • More precise • Faster recovery

Am I a Candidate for *da Vinci*[®] Surgery?

Only you and your doctor can decide whether *da Vinci* Surgery may be right for you. Bring this questionnaire to your appointment to help you discuss your health concerns with your physician.

My symptom(s) or condition(s) are:

- Pelvic Pain
- Abnormal Bleeding
- Uterine Fibroids
- Endometriosis
- Falling Uterus or Bladder (Prolapse)
- Cancer
- Other/Not Sure

Please check all that apply:

- I would like to avoid a large incision and scar.
- It is important that I am able to return to my normal activities (e.g., driving) as soon as possible after surgery.
- I would like to minimize the length of time I am in the hospital to just one night, if possible.
- I would like to minimize my blood loss and need for blood transfusion(s) during surgery.
- I would like to limit the amount/duration of pain medications I take after surgery.
- I would like to minimize my risk of infection after the surgery.
